## EDUCATION

### UNI PRO COMPANY

FRONTEND DEVELOPER  
ENGLISH COURSE

( 2023-PRESENT )

## SUMMARY

A Frontend Programmer is responsible for designing and implementing the user interface (UI) and user experience (UX) of web applications. They work closely with designers and backend developers to create responsive, interactive, and visually appealing websites or applications. Their primary tools include HTML, CSS, and JavaScript, along with frameworks like React, Angular, or Vue.js. They focus on optimizing performance, ensuring cross-browser compatibility, and enhancing accessibility. A strong understanding of design principles, user-centered design, and problem-solving skills are crucial for this role.

## SKILLS

- HTML/CSS: Proficiency in writing clean, semantic HTML and CSS for layout and styling.
- JavaScript/TypeScript: Strong knowledge of JavaScript, including ES6+ features, and familiarity with TypeScript.
- Responsive Design: Experience with creating mobile-first, responsive designs using CSS media queries and frameworks like Bootstrap.
- Frontend Frameworks: Expertise in frameworks/libraries such as React, Angular, or Vue.js.
- Version Control: Proficiency with Git and GitHub or other version control systems.
- 

## WORK EXPERIENCE

### FRONTEND WORKER

UNI PRO COMPANY (2023-PRESENT)

- Developed and Maintained Web Applications: Created and maintained responsive, user-friendly web applications using HTML, CSS, and JavaScript. Worked on both new projects and ongoing maintenance of existing websites.
- Implemented Responsive Design: Ensured all web applications were fully responsive and mobile-friendly. Used frameworks like Bootstrap and CSS Grid for flexible layouts.
